Subject: EHC Long Term Study Details

Bettie:

I need to get from you the current information on the plan for the long term EHC timeline. I believe the clinical testing start has been slightly pushed back, therefore, I need the new dates. I also need to know if you've gotten any information from MDS as to their expectations on timing for post-clinical testing steps (analysis, data management, draft report, etc.).

I really need this information today or tomorrow if possible so that I can appropriately update the existing timeline. Please let me know.

Thanks,
Valerie
